

SOME SIMPLE REMINDERS FOR WINTERIZATION OF WATERLINES:

- Shut off your outside hose bib with the inside shutoff. You can wrap the hose bib with some rags and tape or purchase an insulated cover for the hose bib.
- Be sure to check the water line where it comes in to your house. If it is in an unheated part of your house, protect it with pipe insulation and heat tape. This will help keep it from freezing.
- If you have these items in place, be sure to check them, and promptly fix and/or replace anything that is not working.
- It is also a good idea to make sure you know where your outside shutoff is. By keeping it clean of snow and ice the Water Department can get to it quickly should anything happen.

If you have any questions, please feel free to contact the Water Department at 684-5396.
